

LIFE SAVING RULES

FOR EMPLOYEES OF THE
STREICHER GROUP,
TEMPORARY EMPLOYEES,
SUBCONTRACTORS,
HELPERS AND
OTHER CONTRACTORS OF
THE **STREICHER GROUP**

During work I use my complete and intact PPE, that meets the requirements of the work activities.

Before starting work I cut off the plant or machine I am working with from all energies (e.g. mechanical, chemical, electrical energy or liquids/gases, which are under pressure).

I keep away from transport or working areas of machines and vehicles.

I only go down into excavation pits, if the protective device (e.g. retaining walls) is standard-conformally and adequately fixed against sliding soil.

I use correct work equipment / climbing aids for works at height. Furthermore I check the stability and consider the maximum permissible working duration.

I use my properly checked safety harness for safe working conditions in great heights (> 2.0 m).

Before I enter a container, silo or narrow room I make sure that the atmosphere is measured and controlled during the whole working procedure.

Before starting work I make sure that the first aid equipments are completely available and accessible at any time.

I only use tested, intact and safe work equipment for working.

I immediately report accidents and near-accidents to my supervisor or to the responsible department.

➡ GOAL: ZERO ACCIDENTS / INCIDENTS

SAFETY RULES

FOR EMPLOYEES OF THE
STREICHER GROUP,
TEMPORARY EMPLOYEES,
SUBCONTRACTORS,
HELPERS AND
OTHER CONTRACTORS OF
THE **STREICHER GROUP**

Standing below suspended load is strictly forbidden.

Working and driving a vehicle under the influence of alcohol or drugs is absolutely forbidden.

To use a phone or other communication tools while driving a vehicle is prohibited.

When working with flammable gases and liquids the danger of fire and explosion has to be excluded.

Never remove, manipulate or avoid safety devices.

Emergency exits, emergency escape routes and other emergency or fire-extinguishing devices may not be obstructed at any time.

Smoking is only allowed in the signposted areas.

Work equipment may not be alienated or incorrectly used. Sites and work equipment generally have to be kept in tidy and clean conditions.

Before starting with earthworks it has always to be ensured, that no unknown external pipelines or pipelines which are under pressure/gas exist.

Take only the required quantities of hazardous substances from storage for one working day and always store them correctly. Unintentional leakage or environmental damage have to be immediately reported.

⇒ GOAL: ZERO ACCIDENTS / INCIDENTS
